

HARISH BABU

Software Developer | AI/ML Engineer | Data Analyst | Flutter Developer

📞 7358902785 | ✉ harishbabu7358@gmail.com | LinkedIn: linkedin.com/in/harishbabu | Portfolio: portfolio-1n7n.onrender.com

PROFESSIONAL SUMMARY

B.Tech graduate (2026) in Artificial Intelligence and Data Science with proven experience in software development, data analysis, and AI/ML engineering. Certified in Flutter Mobile App Development through Saint Louis University's Excelerate program. Skilled in Python, SQL, RAG pipelines, LLM integration, and Flutter — with shipped projects including an AI chatbot and an Android music player with on-device ML. Eager to contribute as a fresher Software Developer in a fast-moving product team.

TECHNICAL SKILLS

Programming Languages: Python, Dart, HTML, CSS

Data & Analytics: Pandas, NumPy, SQL, Excel, Power BI, Matplotlib

AI / ML & NLP: Machine Learning, NLP, RAG Pipelines, LLM Integration (llama.cpp), ChromaDB

Mobile & App Dev: Flutter, Kotlin, Android (Media3/ExoPlayer, RecyclerView, Room Database)

Tools & Platforms: Git, VS Code, REST API, Vector Databases

Soft Skills: Problem Solving, Analytical Thinking, Communication, Adaptability

EDUCATION

B.Tech in Artificial Intelligence and Data Science (AI-DS)

Grace College of Engineering, Coimbatore

Nov 2022 – Jun 2026 (Expected)

CERTIFICATIONS & INTERNSHIPS

Mobile App Development with Flutter Virtual Internship — Saint Louis University × Excelerate | Completed: November 4, 2025

Certificate of Participation for successfully completing a virtual internship focused on Flutter mobile app development. Issued by Saint Louis University in partnership with Excelerate.

WORK EXPERIENCE

Data Analyst

Tamil Nadu Advanced Technical Training Institute(TATTI)| Remote/Online

- Processed, cleaned, and validated large datasets using Python and Pandas, ensuring high data quality for analysis pipelines.
- Performed exploratory data analysis (EDA) to identify trends and patterns in structured business data.
- Developed data visualizations using Matplotlib to communicate insights supporting short-term business decisions.
- Automated repetitive data preprocessing workflows, reducing manual effort by 20% and improving team efficiency.
- Collaborated cross-functionally to interpret analytical findings and present clear, actionable insights.

Data Analyst Intern

TheDal | Remote / Online

- Conducted EDA on sales and customer datasets to uncover actionable business insights.
- Built interactive charts and dashboards to monitor and visualize key performance indicators (KPIs).
- Applied NLP techniques to analyze customer feedback and perform sentiment analysis.
- Documented and communicated findings to support data-driven decision-making across teams.

Flutter Mobile App Development Intern (Virtual)

Saint Louis University × Excelerate

Completed: November 4, 2025

- Completed a virtual internship program focused on mobile application development using Flutter and Dart.
- Gained hands-on experience in building cross-platform mobile interfaces and applying Flutter UI component design.
- Worked with Flutter's widget ecosystem, state management concepts, and mobile app deployment principles.
- Received an official Certificate of Participation issued by Saint Louis University and Excelerate on completion.

PROJECTS

RAG-Based AI Chatbot

Python | ChromaDB | LLM (llama.cpp) | Vector Search

- Designed and implemented a Retrieval-Augmented Generation (RAG) system to improve LLM answer accuracy using contextual document retrieval.
- Built backend logic in Python, integrated local LLMs via llama.cpp, and used ChromaDB for vector storage and similarity search.
- Focused on response relevance evaluation and optimizing retrieval quality for domain-specific queries.

AI-Powered Offline Music Player — Android

Kotlin | Media3 (ExoPlayer) | Room Database | On-Device ML

- Developed a fully offline Android music player featuring on-device ML-based genre classification for intelligent playback.
- Implemented audio processing, smart song queuing, background music scanning, and efficient local file management.
- Designed a clean, intuitive UI/UX using RecyclerView and Room Database for persistent local storage.

Online AI Chatbot — Groq API + Flutter

Flutter | Dart | Groq AI API | REST API

- Built a cross-platform AI chatbot using Flutter and the Groq AI API for real-time, low-latency conversational responses.
- Implemented prompt handling, conversation state management, and efficient API usage with clean backend logic.

Offline Desktop Chatbot

Python | NLP | Local Inference

- Developed a Python-based offline chatbot with full local inference — no cloud dependency — using NLP techniques.
- Gained practical experience handling structured and unstructured text data for conversational AI applications.
